(EXPEDITED) PETITION TO EXPUNGE PART OF ORIGINAL DISCLOSURE (37 C.F.R. § 1.183)

Sir:

Applicant hereby petitions to suspend the rules under 37 C.F.R. § 1.183 in order to expunge a chart containing personal information (the "Chart") from the disclosure originally filed in this application. This petition requires a waiver of the requirements of 37 C.F.R. § 1.59(a). Expedited consideration of this petition is respectfully requested.

The Chart in the instant patent application contains personal information that was filed as part of the original disclosure on March 2, 2004. Applicant respectfully requests that the present petition be granted, and hereby submits a substitute sheet entitled "Figure 1" to replace the Chart in the event the substitute sheet can be immediately entered into the record following consideration of this petition. In the alternative, Applicant requests permission to submit the substitute sheet later during prosecution for consideration by the responsible Examiner. Applicant further requests that the originally filed Chart be made not available to the public and non-viewable on the Public Patent Application and Information Retrieval (PAIR) access site.

U.S. Serial No.: 10/791,439 Docket No.: 31718-701.201

Other remedial actions that may become necessary to prevent public disclosure of the Chart and its contents is also respectfully requested.

The basis for this petition under 37 C.F.R. § 1.183 and why justice requires suspension of the rules (37 C.F.R. § 1.59(a)) in this extraordinary situation are provided below.

<u>REMARKS</u>

The instant patent application entitled "Methods and Systems for Identifying Users and Detecting Fraud by Use of the Internet" was filed on March 2, 2004. Due to a miscommunication between the applicant inventor Ori Eisen and his attorney, this submission included a Chart containing personal information and partial excerpts of non-fictitious information for non-fictitious persons. The Chart unfortunately contains real names of people, their respective e-mail addresses, and partially redacted credit card numbers.

There is nothing in the record that supports the need for the kinds of private information included in the originally filed Chart. The instant patent application is related generally to electronic commerce (e-commerce) transactions and solutions for identifying computers, particularly those associated with fraudulent online transactions. In order to explain concepts of the invention provided herein, it was intended for the Chart to include information about fictional online users including phony names, e-mail address, credit card information. Whether the underlying information in the Chart is fictitious or not adds no real value for purposes of describing and explaining the concepts of the invention in the instant application. Meanwhile, the magnitude of possible harm in the event the originally filed Chart were to be published is significant. This was an inadvertent error committed during the filing of the instant patent application and the Chart must be expunged from the record in the interests of justice.

Below are facts that are believed to be relevant to this petition:

- 1. The instant patent application (Patent Application Serial No. 10/791,439) was filed on March 2, 2004.
- 2. The patent application as filed contained fourteen (14) pages including claims, and also an additional enclosure identified as "Chart" in the application transmittal.

U.S. Serial No.: 10/791,439 Docket No.: 31718-701.201

3. The application transmittal further included a Request for Non-Publication pursuant to 35 U.S.C. 222(b)(2) and was not the subject of an application filed in another country requiring publication of the application 18 months after filing of the application.

- 4. The originally filed Chart consists of forty-two (42) pages contains numerous dates, email addresses, names and partially redacted credit card numbers.
- 5. The Chart appears to be a printout from an Excel document with improper pagination whereby columns run-off the letter sized spreadsheet configured with a portrait-style layout.
- 6. In the last paragraph on p. 5 of the patent application (five lines from the bottom of the page), the following reference is made to the Chart "Referring to the chart, what is shown is a series of typical transactions on the Internet between a merchant and several customers."
- 7. Under the section entitled "Brief Description of the Chart," the following reference is made to the Chart "The chart illustrates the versatility and accuracy of the present invention in weeding out possible fraudulent online transactions."

A review of the Chart and its contents clearly demonstrates that it was unintentionally submitted. The printout and format of the Chart further lends support to the conclusion that it was submitted by mistake in that the pagination error caused the Chart to nearly triple in length. Moreover, the transaction information provided in the Chart was provided to serve as exemplary transactions in which fraud could be detected in accordance with the invention. Applicant contends that none of the content provided in the Chart is necessary to describe and claim the invention as required under applicable patent statutes (Title 35 U.S.C.) and governing rules, nor is such information material to patentability or would otherwise be considered important by a reasonable examiner.

This error was only recently uncovered during the inspection of the file for this application by new counsel for Applicant. A Power of Attorney for new counsel was filed on June 20, 2005. Upon recent inspection of the record to confirm the inadvertent filing of the Chart, Applicant is diligently filing this petition to expunge. Furthermore, because Applicant requested non-publication of the patent application under 35 U.S.C. 222(b)(2), this application is not currently scheduled for publication. In the event a patent issues from this patent application, or if Applicant decides to withdraw the non-publication request, the interests of justice require Cinardolipalible Control of the patent application request, the interests of justice require

U.S. Serial No.: 10/791,439

Docket No.: 31718-701.201

that the Chart be expunged from the record. Because information forming part of the original disclosure may not be expunged as stated under 37 C.F.R. § 1.59(a) in general, Applicant hereby requests suspension of the rules pursuant to 37 C.F.R. § 1.183 in this instance.

Based upon these facts and inspection of the originally filed patent application, Applicant's petition should be granted. Applicant requests that the Chart be expunged from the original disclosure and that it not be published or otherwise disclosed to the public such as by inspection of the physical files or the PAIR access site. Favorable and prompt action on this expedited request is respectfully solicited in this extraordinary situation,

The Commissioner is hereby authorized to charge the fee of \$ 130.00 as required by 37 C.F.R. § 1.17(h), the fee of \$ 400.00 for expedited consideration of this petition, and any other additional fees or credit any overpayment associated with this communication to Deposit Account No. 23-2415 (Docket No.: 31718-701.201).

Respectfully submitted,

WILSON SONSINI GOODRICH & ROSATI Professional Corporation
